

OV7949 NTSC/PAL product brief

high-performance security CameraChip sensor

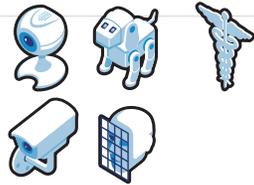

The OV7949 CameraChip™ sensor is known as one of the most highly integrated true video NTSC/PAL camera systems. With high functionality and proven excellence in extreme low light settings, the OV7949 image sensor can compete head-to-head with the highly competitive CCD segment of the security surveillance market.

With an ever growing security surveillance camera market, the OV7949 image sensor is the most cost efficient solution for applications requiring a high performance video camera with a small footprint, low voltage, low power consumption and high performance. The OV7949 excels in low light conditions and can operate within a wide temperature range from -20°C to +70°C.

Key features of the 1/3 inch OV7949 include reduced blooming/smearing effects, and a Genlock function, which allows the synchronization of two or more video sources. This enables the development of very affordable closed-circuit security monitoring systems that are very easy to set up, making the OV7949 a very suitable product for consumer and small business solutions.

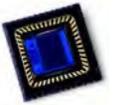

The OV7949 supports NTSC/PAL composite video output and can directly interface with a TV monitor or another device with 75 Ohm loading. These features and functions of the OV7949 make it a strong solution for any surveillance camera application.

applications

- security/surveillance cameras
- video conferencing
- video phones
- video e-mail
- toys
- fingerprint equipment
- medical and dental equipment

OV7949

ordering information

- **OV07949-C10A**
(color, NTSC CLCC-48)
- **OV07949-C20A**
(color, PAL CLCC-48)
- **OV07449-C10A**
(b&w, NTSC CLCC-48)
- **OV07449-C20A**
(b&w, PAL CLCC-48)

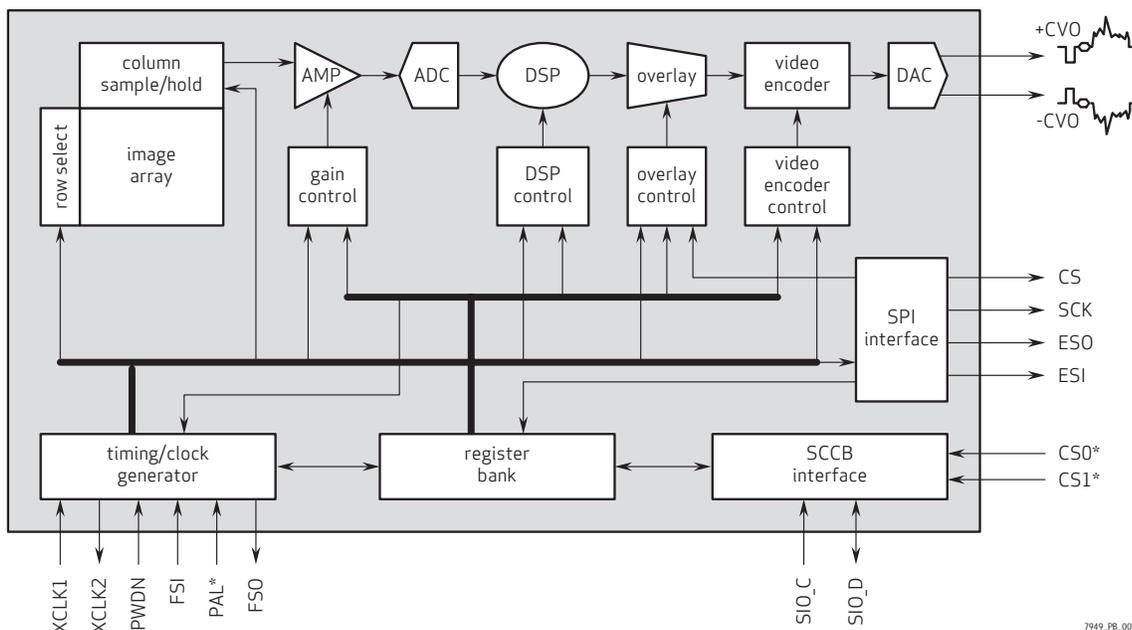

product features

- OmniPixel2™ technology
- single chip 1/3" format video camera
- composite video (NTSC/PAL) differential output drive
- sensitivity boost (+42 dB)
- automatic exposure/gain with 16-zone control
- auto white balance control
- aperture/gamma correction
- 50/60 Hz flicker cancellation
- external frame sync capability (Genlock)
- SPI/EEPROM used to control overlay and set other customer variables
- I2C compatible serial camera control bus (SCCB) control interface for register programming
- low power consumption
- extremely low dark current for high temperature applications
- defective pixel correction

product specifications

- **array size:**
PAL: 628 x 586
NTSC: 510 x 496
- **power supply:**
analog/ADC/I/O: 3.3 VDC ± 5%
digital core: 1.8 VDC ± 5%
- **power consumption:**
168 mW (DVDD=1.8V,
all other voltages=3.3V,
75 Ω loading)
- **image area:**
5.961 mm x 4.276 mm
- **temperature range:**
-20°C to +70°C
- **exposure time range:**
1/60 s - 12 μs (NTSC)
1/50 s - 12.5 μs (PAL)
- **sensitivity:**
4.6V/Lux-sec @ 5600K
- **S/N ratio:** 48 dB (max)
- **dynamic range:** 50 dB
- **pixel size:** 9.2 μm x 7.2 μm
- **dark current:** 70 mW/s @60°C
- **fixed pattern noise:**
0.079% of V_{PEAK TO PEAK}
- **package dimensions:**
14.22 mm x 14.22 mm
